

Appendix E

Comments Received on the Final EIS and Responses

The CRC project included a 30-day review period for the Final Environmental Impact Statement (FEIS), which began with publication of the FEIS on September 23, 2011, and concluded on midnight of October 24, 2011, including all mailed comments post-marked by October 24 at midnight. During the review period, the CRC project received a total of 134 submittals with substantive comments on the FEIS submitted through a variety of means, including by letter, comment form and email. Each of these submittals, with responses by the Federal Highway Administration and Federal Transit Administration, are included electronically in this appendix.

To view the individual comments and responses, please click on the Appendix E folder on this CD, and then click on the file named "index.html." The comments are organized first by commenter type (federal, state and local agency; Tribe; CRC advisory group; neighborhood association; business association; non-governmental organization; business; and public) and then by the comment number. To view a specific comment and response, simply click on the name of the commenter from the list.
